Assignment 2 - Basic CSS

Due: Thursday, 18 January 2024, 11:59 PM

Main Page (username.github.io):

Make sure to include a link to this assignment as Assignment 2. In addition to creating assignment 2, you will also be adding styles to your main page. This is your main portal, so make it nice :)

- Change the default font of the page to something more appealing
- Change the color scheme, recoloring all the text, and making sure it matches nicely. Don't just pick one color.
- Add a background color or image (Which makes sense), then
- Add a formatted div, which allows the page content to be easily viewed.
- Remove the underline on the links to each assignment
- Recolor the links of each assignment so they are not the default blue.
- Make sure to use Id's
- Make sure all your colors match, and your theme looks nice.

Assignment 2 Page:

Create a new web page, on a topic of your choice. Your website will include the following:

- 1 index.html page
- h1 for the title
- A navigation with 4 different links (Home, About, Pictures, Contact Us). Home points to index.html, and the others just redirect back to this page with an href="#"
- An h2 for a sub header
- At least 2 paragraphs, these can be lorem ipsum
- At least 2 pictures, which are nicely formatted to fit in
- A table with at least 3 columns and 5 rows

Styling Requirements:

- The font of the page changed to something more appealing
- A color theme which makes sense based on the content.
- The color scheme will be applied to the whole page, foreground colors, background colors... make it look good.
- Formatted navigation links (background color, padding...), which change format when hovered over
- borders and padding around images
- Table should have padding, borders, background colors
- Body background Image
- A formatted div which allows the page content to be easily readable.
- Make sure to style using all 3 techniques (element, id, and class name)
- Make sure all your colors match, and your theme looks nice.

Helpful Resources:

- [Lorem Ipsum Generator \(https://www.lipsum.com/\)](https://www.lipsum.com/)
- [List of html colors \(https://www.w3schools.com/colors/colors_names.asp\)](https://www.w3schools.com/colors/colors_names.asp)
- [Adobe Color theme generator \(https://color.adobe.com/create\)](https://color.adobe.com/create)

Submit:

- A link to your main page, which properly links to this assignment.
- Makes sure to submit on Dropbox, as a comment, and click the submit button.

Grading:

- -25% per day late

- If you submit an incorrect link you will gather late points for each day the proper link isn't submitted.
- You will lose 5% for each missing or incorrect item.
- You will lose 10% if you have not properly formatted your code. e.g. indentation.
